Professional Summary

Motivated Software Engineer with 5+ years of experience in designing and developing scalable web applications. Proficient in Python, JavaScript, and cloud technologies, with a strong focus on backend development and system architecture. Adept at collaborating in agile environments to deliver high-quality software solutions.

Skills

- Programming Languages: Python, JavaScript, Java, SQL
- Frameworks: Django, React, Node.js
- Tools & Technologies: Docker, Kubernetes, AWS, Git
- Methodologies: Agile, Scrum, CI/CD
- Databases: PostgreSQL, MongoDB

Work Experience

Senior Software Engineer TechCorp, San Francisco, CA Jan 2022–Present

- Developed microservices architecture using Python and Django, improving system scalability by 40%.
- Led a team of 5 engineers in implementing CI/CD pipelines with Jenkins and Docker, reducing deployment time by 30%.
- Integrated AWS services (Lambda, S3) to enhance application performance and storage solutions.

Software Engineer

InnovateSoft, Seattle, WA

Jun 2019–Dec 2021

- Built RESTful APIs using Node.js and Express, supporting 10,000+ daily active users.
- Optimized database queries in PostgreSQL, decreasing response times by 25%.
- Collaborated with front-end developers to integrate React-based UI components.

Education

B.S. in Computer Science Stanford University, Stanford, CA Sep 2015–May 2019

- GPA: 3.8/4.0
- Relevant Coursework: Algorithms, Data Structures, Cloud Computing, Software Engineering

Projects

E-Commerce Platform GitHub: github.com/johndoe/ecommerce 2023

- Developed a full-stack e-commerce application using Django and React, with payment integration via Stripe.
- Deployed on AWS EC2 with auto-scaling, handling 1,000 concurrent users.
